Career Objective

Looking for an opportunity to start my career in software development, apply my technical knowledge to real-world projects, and learn new skills along the way. I want to grow as a developer while contributing to the team and the organization.

Education

B.Tech. in Computer Science and Engineering

2023 – 2027

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

CGPA: 7.20/10

Class XII, CBSE – S N Public School

2022

Percentage: 66.16%

Class X, CBSE – J S G S Public School

2020

Percentage: 78.33%

Technical Skills

Languages: Java, Python, C, SQL

Web Technologies: HTML, CSS, JavaScript, React.js, Flask, Streamlit

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV

Databases/Tools: MySQL, SQLite, Git, GitHub, VS Code

Core Concepts: Data Structures and Algorithms, OOP, DBMS, Computer Networks, Machine Learning

Experience

Summer Intern – Northern Railway, Charbagh, Lucknow 15 Jun 2026 – 11 Jul 2026 [\[View Certificate\]](#)

Project: Development of Face Identification Software and its Implementation React.js, Flask, OpenCV, face-recognition

- Developed a face identification system for employee enrollment, face capture, recognition, and attendance management.
- Built React.js components for login, dashboard navigation, camera capture, face enrollment, recognition, and attendance reports.
- Developed Flask REST APIs and connected the frontend with the backend for image processing and face recognition.
- Used OpenCV and the face-recognition library to process captured images and identify enrolled faces.

Projects

AI-Powered Carbon Footprint Estimator

Python, Streamlit, Scikit-learn, Pandas, NumPy

- Built a Streamlit application that estimates monthly carbon emissions from transportation, energy use, diet, waste, and lifestyle inputs.
- Prepared input data using categorical encoding and feature scaling with `StandardScaler` for machine learning prediction.
- Used an `MLPRegressor` model to estimate monthly CO₂ emissions and displayed category-wise emission contributions.
- Added interactive charts, custom CSS, and practical suggestions to help users understand their carbon footprint.

To-Do List Web Application

HTML5, CSS3, JavaScript, LocalStorage [\[Live Link\]](#)

- Created a web-based To-Do List to manage everyday tasks with options to add, complete, and remove tasks.
- Used JavaScript to handle user interactions and update the task list dynamically through DOM manipulation.
- Added LocalStorage so that tasks remain saved even after refreshing or reopening the browser.
- Built a dynamic welcome section showing the current time, date, and time-based greetings using JavaScript.

Training & Recognition

Full Stack Development Trainee – GRAS tech

90 Hours [\[View Certificate\]](#)

- Completed a 90-hour project-based Full Stack Development training program covering frontend and backend development through practical implementation.

Certificate of Appreciation – Learnovate Enterprises

Apr 2026 [\[View Certificate\]](#)

- Recognized for contributions and effort in completing the Learnovate Enterprises Soft Skill Program at Babu Banarasi Das Educational Group, Lucknow.

Certifications

- TCS iON Career Edge – Generative AI Essentials

[\[View Certificate\]](#)

- IBM – Data Analysis with Python

[\[View Certificate\]](#)
